11 January 1985

NOTE FOR: D/ICS
DD/ICS

THROUGH: Chairman, COMIREX *e*

SUBJECT: Meeting with Colonel Gil Rye and Dr. Harry Dawson on Civil Earth
Imaging from Space

25X1

1. I met today with Col. Rye of the NSC Staff and Dr. Dawson of the House Science and Technology Committee Staff to discuss the paper "Refinement of US Policy Pertaining to Civil Earth Imaging from Space" which Dr. Dawson and I prepared (DCI/ICS/84-4664, 27 November 1984, S/NF). Col. Rye termed the paper "excellent" and proposed that a working group be formed to prepare the recommended policy supplement. The three of us agreed that the Working Group should function under the auspices of the SIG(Space) and that the Department of Commerce would be a good candidate organization to chair it. Col. Rye agreed to talk to Tony Calio at Commerce, give him a copy of the paper, and ask him to consider taking the chairmanship.
